

Refresh AP/DEO Stick

#13209-2

A fast absorbing, dry feel AP/DEO stick engineered for long lasting confidence. Formulated with Ultra Zag™ A77, this high efficacy Aluminum Zirconium Tetrachlorohydrate Gly superfine powder supports up to 48 hour protection, helping keep skin dry even under the most demanding conditions.

The stick's elegant structure is built on cetearyl alcohol and Bentone® Ultimate LC, whose high active clay load delivers exceptional rheological control and reliable suspension of the AP active—without compromising the light, clean aesthetics consumers expect.

To perfect the sensory experience, Amaze® Nordic Barley helps absorb excess oil while promoting a smooth, dry, frictionless glide on application.

A smart balance of structure, efficacy, and sensorial appeal—designed for powerful protection with a refined feel.

INCI	TRADE NAME	FUNCTION	SUPPLIER	%
Cyclopentasiloxane	SF1202	Emollient	Momentive	42.85
Cetearyl Alcohol	Cetearyl Alcohol NF Wilfarol 1618 50:50 MB	Structuring Agent	Wilmar	24.00
C9-12 Alkane (and) Distearidimonium Hectorite (and) Glyceryl Oleate	Bentone® Ultimate LC	Rheology Modifier	Elementis	7.15
Aluminum Zirconium Tetrachlorohydrate Gly	Ultra Zag™ A77	Antiperspirant	Elementis	25.00
Hordeum Vulgare Seed Flour	Amaze® Nordic Barley	Aesthetic Modifier	Nouryon	1.00
Total				100%

Mixing Instructions

- Combine the SF 1202, Wilfarol 1618 50:50, and Bentone® Ultimate LC in the main kettle and heat to 60–65°C and mix until uniform.
- Add the remaining ingredients one at a time mixing until uniform before proceeding to the next.
- Remove from heat but continue mixing until the batch cools close to the solidification point –38°C and pour into components to let the batch setup in its final packaging.
